### 10th Army Public Scholl, Yol Cantt

04/2017 - 05/2018

8.4

## PROJECTS

#### Hotstar Clone (04/2022)

- Its an Over-the-top (OTT) application which provides television shows and movies on this website.
- This web-development project is created with the help of HTML, CSS and JavaScript.
- API is also fetched in this web project which display the details about movies.

#### To-Do Application (11/2020)

- Its a daily use application in which we add our task of day to day work routine.
- This MERN-stack application consists of HTML, CSS, JavaScript, NodeJs, MongoDB.
- Retrieving, updating and deletion of data is more efficient and fast with the usage of MongoDB, This makes the website more swift by 5%.

#### Portfolio Website (03/2023 - Present)

- This is a web-application to present my skill-set, with the desire to connect with other people.
- Technologies working behind this project are HTML, CSS, JavaScript and React.
- The time taken be this website is less because of the implementation of React Routing.
- React's virtual DOM property helps with the faster page loading and making user interactions more serene [Project link](#).

#### Suru Foods (11/2021 - 04/2022)

- A place to quell your hunger.
- This Full-stack application consists of HTML, CSS, JavaScript, React, NodeJs.
- The key elements of this website are using API to fetch list of food items and using react-router to display the items.
- This a passion duo/solo projects.
